

We Need Your Patients

Join Google and LSVT in Project Euphonia

What:

Google is working to make speech recognition more accessible to people with speech disorders. To do this we need samples of disordered speech to train the system. LSVT Global is recruiting people with speech disorders to help. Upon completion of the project, your patients will receive a **\$60 gift card** from Google.

Who:

Your patients with **Parkinson's disease (PD), PSP, MSA, post DBS, or Tremor** with mild, moderate, or severe speech disorders.

How Can You Help?

Refer your patients to us! They will record samples of their speech online in the comfort of their own home, with the assistance of an expert speech clinician.
